Profile

Strategic and results-oriented **product manager** from technical background, having worked across multiple stages of the product lifecycle, collaborating with cross-functional teams to deliver impactful products. Middle Eastern background, having lived in several European countries, has fostered unique relationship management skills. Self-motivated to promote digital transformation ensuring user value is prioritized and aligned to organisational vision. Have been exposed to many industries, working with agile, SAFe, lean, kanban and waterfall.

Expertise

Product Expert – Comfortable taking ownership of complex ideas, being able to learn quickly and present concepts in a digestible format to form clear problem statements. Lead from the front, maintaining big picture vision in all strategic decisions and facilitating effective agile ceremonies and ideation workshops. Keep an acute attention to detail to ensure consistently prioritised backlog that enables all stages of product lifecycle meet requirements and defined success metrics successfully, whilst aligning with product roadmap.

Customer Focus – Naturally curious to understand customers' personas and solve problems collaboratively using a data-driven approach to market analysis. Well-versed in user-centred design processes to ensure the right product is created for the target user by analysing competitors and opportunities. Capitalizing on maximising user value by building user journey maps and maintaining visibility of customer lifecycle. Adapting to insights extracted from user research to form clear user stories that communicate product goals and needs to team.

Autonomous Delivery – Resilient under pressure, being able to organize and prioritize multiple projects/tasks and adapt to real world fluctuations, following agile methodologies. Motivated to ensure success at every stage of product development. Take the initiative to expand knowledge and find the best tactics for efficient delivery by mitigating risks and maintaining certainty amongst stakeholders.

Agile Champion – Enthusiastic attitude when collaborating with cross-functional teams being able to communicate and plan effectively with various organisational positions. Guaranteeing agile values are maintained and team is committed to deliver timely results. Happy to approach people for advice and necessary information, keeping an open-mind and humbly admitting mistakes allowing for positive reflection. Moreover, competent in many languages allowing for instant mutual trust with people of different backgrounds, plus widening perspectives.
